

IHS Markit

A global leader in critical information, analytics, and solutions

February 2021

Forward-looking statements

This presentation contains “forward-looking statements” as defined in the Private Securities Litigation Reform Act of 1995. These statements, which express management’s current views concerning future business, events, trends, contingencies, financial performance, or financial condition, appear at various places in this communication and use words like “aim,” “anticipate,” “assume,” “believe,” “continue,” “could,” “estimate,” “expect,” “forecast,” “future,” “goal,” “intend,” “likely,” “may,” “might,” “plan,” “potential,” “predict,” “project,” “see,” “seek,” “should,” “strategy,” “strive,” “target,” “will,” and “would” and similar expressions, and variations or negatives of these words. Examples of forward-looking statements include, among others, statements we make regarding: the completion of the merger with S&P Global Inc. (“S&P Global”) on anticipated terms and timing, including unforeseen liabilities, future capital expenditures, revenues, expenses, earnings, synergies, economic performance, indebtedness, financial condition, losses, future prospects, business and management strategies for the management, expansion and growth of the combined company’s operations and other conditions to the completion of the merger; the ability of S&P Global and IHS Markit to integrate the business successfully and to achieve anticipated synergies; potential litigation relating to the proposed transaction that could be instituted against S&P Global, IHS Markit or their respective directors; the risk that disruptions from the proposed transaction will harm S&P Global’s and IHS Markit’s business, including current plans and operations; potential adverse reactions or changes to business relationships resulting from the announcement or completion of the merger; rating agency actions; potential business uncertainty, including changes to existing business relationships, during the pendency of the merger that could affect IHS Markit’s financial performance; certain restrictions during the pendency of the merger that may impact IHS Markit’s ability to pursue certain business opportunities or strategic transactions; guidance and predictions relating to expected operating results, such as revenue growth and earnings; strategic actions such as acquisitions, joint ventures, and dispositions, the anticipated benefits therefrom, and our success in integrating acquired businesses; anticipated levels of capital expenditures in future periods; anticipated levels of indebtedness, capital allocation, dividends, and share repurchases in future periods; our belief that we have sufficient liquidity to fund our ongoing business operations; expectations of the effect on our financial condition of claims, litigation, environmental costs, contingent liabilities, and governmental and regulatory investigations and proceedings; and our strategy for customer retention, growth, product development, market position, financial results, and reserves. Forward-looking statements are neither historical facts nor assurances of future performance. Instead, they are based only on management’s current beliefs, expectations, and assumptions regarding the future of our business, future plans and strategies, projections, anticipated events and trends, the economy, and other future conditions. Because forward-looking statements relate to the future, they are subject to inherent uncertainties, risks, and changes in circumstances that are difficult to predict and many of which are outside of our control. Important factors that could cause our actual results and financial condition to differ materially from those indicated in the forward-looking statements are more fully discussed under the caption “Risk Factors” in our Annual Report on Form 10-K, along with our other filings with the U.S. Securities and Exchange Commission (“SEC”). However, those factors should not be considered to be a complete statement of all potential risks and uncertainties. Unlisted factors may present significant additional obstacles to the realization of forward-looking statements. Consequences of material differences in results as compared with those anticipated in the forward-looking statements could include, among other things, business disruption, operational problems, financial loss, legal liability to third parties and similar risks, any of which could have a material adverse effect on our consolidated financial condition, results of operations, credit rating, or liquidity. Therefore, you should not rely on any of these forward-looking statements. Any forward-looking statement made by us in this communication is based only on information currently available to our management and speaks only as of the date of this communication. We do not assume any obligation to publicly provide revisions or updates to any forward-looking statements, whether as a result of new information, future developments or otherwise, should circumstances change, except as otherwise required by securities and other applicable laws. Please consult our public filings with the SEC or on our website at investor.ihsmarkit.com.

Important Information

IHS Inc. was the accounting acquirer in the merger with Markit Ltd. IHS operated, and IHS Markit operates, under a fiscal year that ends on November 30th of each year, while Markit operated under a fiscal year that ended on December 31st of each year. As a result, financial results for the fiscal year ended November 30, 2016 include 12 months of results of IHS and results of Markit from and after the July 12, 2016 closing date of the merger in the new Financial Services segment that IHS Markit has created. Unless otherwise indicated in this presentation, the combined historical information presented is based on the reported GAAP results of IHS for its fiscal year ended November 30th and the historical IFRS results of Markit (now reported as the Financial Services segment of IHS Markit) adjusted to reflect a fiscal year ended November 30th. The combined historical financial information set forth in this presentation has not been prepared in accordance with SEC rules, including Article 11 of Regulation S-X, and it therefore does not reflect any of the pro forma adjustments that would be required by Article 11 of Regulation S-X. In addition, certain stand alone historical results of Markit (now reported as the Financial Services segment of IHS Markit) are presented based on the reported results of Markit for its December 31st fiscal year without any adjustment for the new fiscal year.

Non-GAAP measures

Non-GAAP financial information is presented only as a supplement to IHS Markit’s financial information based on U.S. generally accepted accounting principles (“GAAP”). Non-GAAP financial information is provided to enhance the reader’s understanding of IHS Markit’s financial performance, but none of these non-GAAP financial measures are recognized terms under GAAP and should not be considered in isolation from, or as a substitute for, financial measures calculated in accordance with GAAP. Definitions of IHS Markit non-GAAP measures and reconciliations to the most directly comparable GAAP measures are provided within the schedules attached to IHS Markit’s quarterly earnings releases (or the IHS Inc. quarterly earnings releases as applicable) on the Investor Relations section of the company’s website (investor.ihsmarkit.com). This presentation also includes certain forward-looking non-GAAP financial measures. IHS Markit is unable to present a reconciliation of this forward looking non-GAAP financial information because management cannot reliably predict all of the necessary components of such measures. Accordingly, investors are cautioned not to place undue reliance on this information. IHS Markit uses non-GAAP measures in its operational and financial decision making. IHS Markit believes that such measures allow it to focus on what it deems to be more a reliable indicator of ongoing operating performance and its ability to generate cash flow from operations. IHS Markit also believes that investors may find these non-GAAP financial measures useful for the same reasons, although investors are cautioned that non-GAAP financial measures are not a substitute for GAAP financial measures or disclosures. None of these non-GAAP financial measures are recognized terms under GAAP and do not purport to be an alternative to any other GAAP measure.

Non-GAAP measures are frequently used by securities analysts, investors and other interested parties in their evaluation of companies comparable to IHS Markit, many of which present non-GAAP measures when reporting their results. These measures can be useful in evaluating IHS Markit’s performance against its peer companies because IHS Markit believes the measures provide users with valuable insight into key components of GAAP financial disclosures. However, non-GAAP measures have limitations as an analytical tool. Because not all companies use identical calculations, IHS Markit’s presentation of non-GAAP financial measures may not be comparable to other similarly titled measures of other companies. They are not presentations made in accordance with GAAP, are not measures of financial condition or liquidity and should not be considered as an alternative to profit or loss for the period determined in accordance with GAAP or operating cash flows determined in accordance with GAAP. As a result, these performance measures should not be considered in isolation from, or as a substitute analysis for, results of operations as determined in accordance with GAAP.

Trademarks, Service Marks and Copyrights

IHS Markit owns or has rights to use the trademarks, service marks and trade names that it uses in connection with the operation of our business; other trademarks, service marks and trade names referred to in this presentation are, to its knowledge, the property of their respective owners. IHS Markit also owns or has the rights to copyrights that protect aspects of its products and services. Solely for convenience, the trademarks, service marks, tradenames and copyrights referred to in this presentation are listed without the ®, TM and © symbols, but IHS Markit will assert, to the fullest extent under applicable law, its rights or the rights of the applicable licensors to these trademarks, service marks and tradenames.

We created the global leader in information, analytics and solutions

- > Global, multi-industry scale in capital-intensive markets
- > Strong competitive position supported by breadth and depth of product offerings
- > Unique proprietary industry information and expertise creates exciting opportunities in analytics
- > Proven track record of organic growth and economic resilience
- > Recurring revenue model with high revenue visibility and renewal rates
- > High operating leverage, strong free cash flow, and capital structure flexibility

Consistently achieving our long-term financial goals should produce strong shareholder returns

Long-term annual financial goals

5%-7% organic revenue growth

44-46% adj EBITDA margin (100bps of annual expansion ex FX)

\$1b+ capital return through dividend and share repurchases¹

Solid double-digit adj EPS growth (earnings compounder)

¹Capital policy is to return 50-75% of annual capital capacity to shareholders through share buybacks and a quarterly cash dividend. The merger agreement with S&P Global restricts IHS Markit's ability to purchase its shares and therefore IHS Markit's share repurchase program is currently suspended through November 2021, other than for the repurchase of shares associated with tax withholding requirements for share-based compensation.

Our diversified portfolio of leading assets reflects multiple areas of strong performance in high-growth industries

Financial Services (42% of total revenue)

- Strong positions in pricing and reference data, loans, and credit
- High growth indices, compliance & regulation, and private capital markets businesses

Transportation (27% of total revenue)

- Sustainable strength due to continued new products
- Strong market position in legacy Polk and CARFAX

Resources (20% of total revenue)

- Best-in-class assets
- High growth chemicals, power, gas, coal, renewables and downstream pricing businesses

CMS (11% of total revenue)

- Leading distributor of technical engineering standards
- Solid market position in economic and country risk analysis

Financial Services

INFORMATION

- Pricing, Liquidity & Reference Data
 - Indices & ETFs
 - Valuation Services - OTC, Cash & Private
 - Equities Data & Analytics
 - Research, Sales & Trading
 - Corporate Solutions
- Fixed income pricing services covering the entire market – 2.5mm Bonds, 11k CDS curves and 6.5k Loans
 - Independent valuations for all OTC derivatives instruments, including private assets
 - Leading benchmark and liquid tradable indices across fixed income and equities
 - PMI surveys provide leading economic indicators covering 83% of global GDP
 - Alternative equities data services used for risk mgmt and alpha generation – includes securities lending data, dividend forecasts and trading analytics
 - Advisory and digital solutions to 2,500+ public issuers

SOLUTIONS

- New Issuance Solutions
 - Loans Management
 - Enterprise Data Management
 - Alternatives Portfolio Monitoring
 - Regulatory and Compliance
 - Digital Solutions
- Workflow solutions, analytics, content and managed services to support the new issuance lifecycle in the global markets
 - Platform to support all aspects of loan management and oversight that reduces risk and increases efficiency
 - Platform for acquiring, validating and distributing trade, operational, risk, financial and customer data
 - Manage flow of data and support portfolio monitoring, analytics and reporting for GPs, LPs and Fund of Funds
 - Industry-leading risk management, compliance and tax solutions

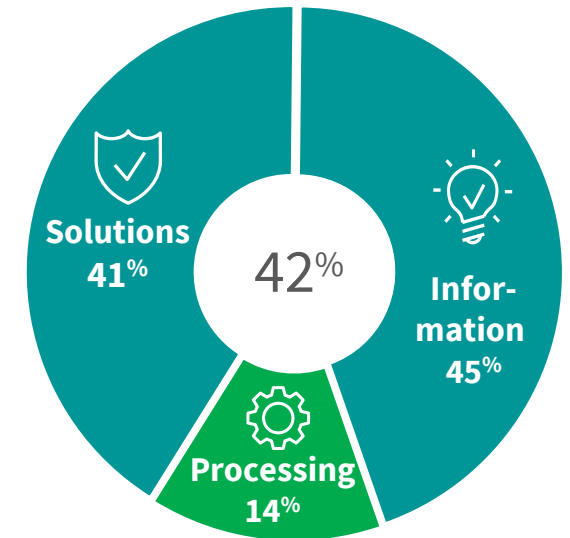

PROCESSING

- Derivatives
 - Loan Settlement
- End-to-end trade processing and workflow solutions that support all participants in OTC trading from post-trade notices of execution, trade confirmation and allocations to clearing and reporting across rates, equities, fx, and credit markets
 - Connects thousands of market participants in a single network that automates post-trade processing across the global leveraged loan market

Our path forward

We have strong positioning which will allow us to compete over the long term

PRODUCT

Strong offerings, many with #1 market positions, many that can attain that status

TECHNOLOGY

Powerful diverse technology and expertise we can leverage

COLLEAGUES

Talented colleagues with common vision, mission and values

CUSTOMERS

Broad and deep trusted relationships in attractive end-markets

BRAND

Strong, well-known brand and sub-brands in many key verticals

We will make targeted investments across four key areas

TECHNOLOGY

Continued investment in data lake, machine learning, artificial intelligence and cloud-based delivery

PRODUCT

Additional investment in organic growth, including predictive analytics and business tools

CUSTOMERS

Leveraging our customer relationships to increase retention and cross-sell

COLLEAGUES

Inspiring and investing in our global team to drive our growth

Advanced analytics present a significant opportunity for IHS Markit

OPPORTUNITY

- Leverage combined proprietary datasets and apply new analytical methods
- Streamline data infrastructure to optimize operations

WHY NOW?

- Customer demand is strong for deeper insight
- Required technology is well established, accessible and economically feasible
 - > Able to capture and store massive amounts of complex data
 - > Cluster computing enables rapid, near real-time processing of data

Leveraging our proprietary data and industry expertise positions us to benefit from increasing demand for analytics

	Data	Industry expertise	Analytics	Computing power
IHS Markit	<ul style="list-style-type: none"> Rich proprietary datasets Can comingle client data 	<ul style="list-style-type: none"> Deep subject expertise Good grasp of client needs Access to clients 	<ul style="list-style-type: none"> Continued investment required 	<ul style="list-style-type: none"> Can leverage commoditized computational power

Financial Performance and Capital Strategy

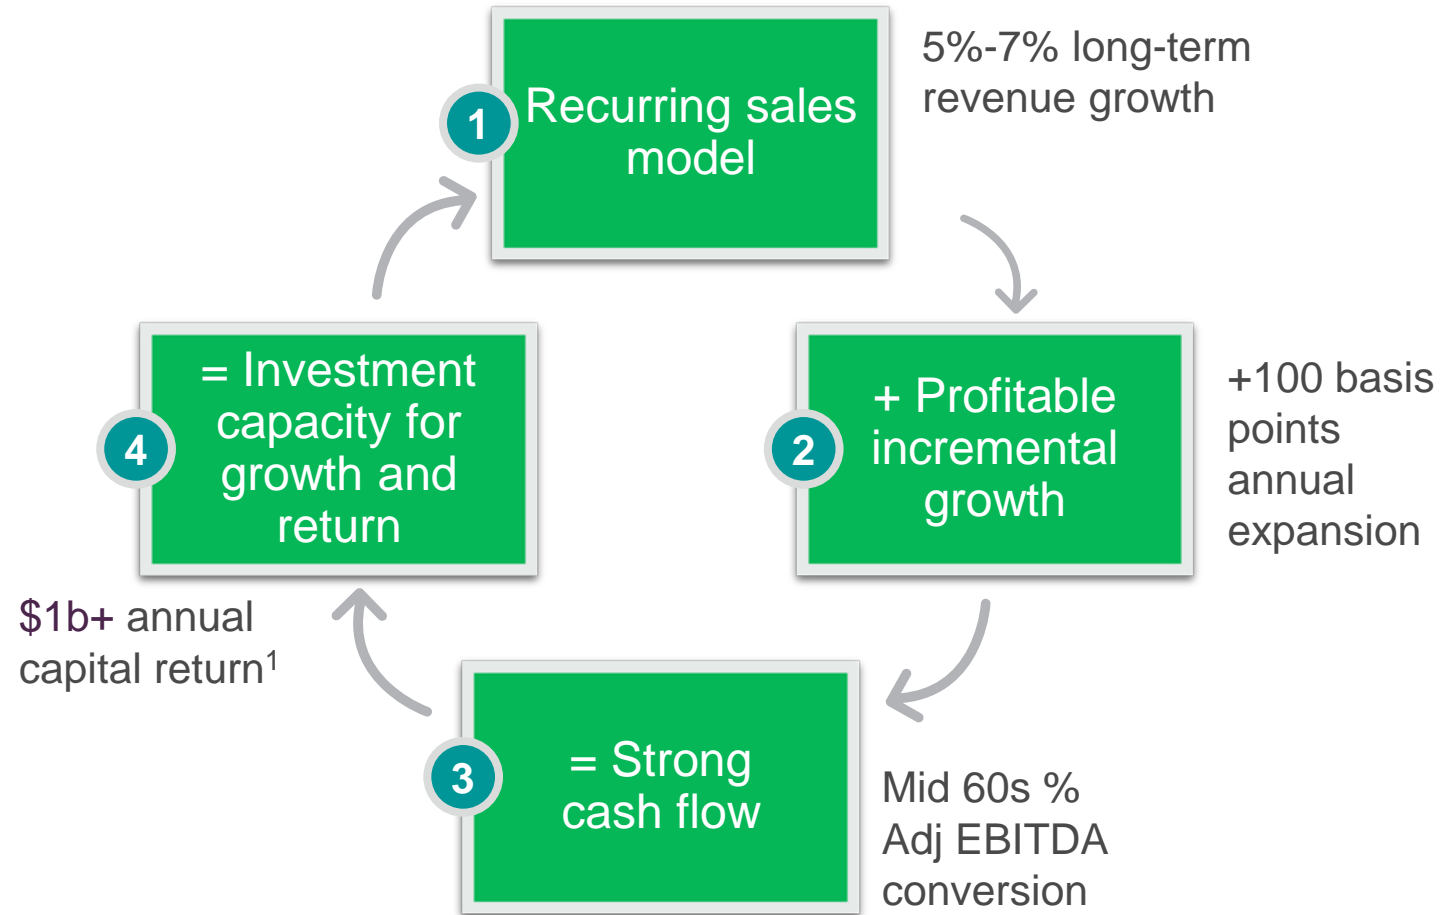

IHS Markit business model creates a cycle of profitable growth and reinvestment capacity

Predictable and highly resilient recurring revenue streams

Proprietary “**must-have**” offerings

Incremental margin growth from “build once sell many times” model

Strong cash conversion creates continuous cash flow and investment capacity for growth and return

¹The merger agreement with S&P Global restricts IHS Markit’s ability to purchase its shares and therefore IHS Markit’s share repurchase program is currently suspended through November 2021, other than for the repurchase of shares associated with tax withholding requirements for share-based compensation.

Highly recurring revenue delivers strong and resilient growth

Total Revenue (\$B)¹ +8% Annualized Growth

2020 Revenue Sources 88% recurring revenue

¹ 2012-2014 includes Markit's reported revenue for year ended December 31. All other periods represent 12 months ended November 30 for both IHS and Markit.

² FY 2020 organic revenue decline including events and BPVC is -1%.

Scaled segments drive solid long-term growth potential

2020 Revenue Distribution

Quarterly dividend
(~1% yield annually)

**Develop and
maintain diversified
funding access**

Promotes greater
transaction ease and
liquidity

¹ Capital capacity defined as annual free cash flow plus additional capacity generated through annual adjusted EBITDA growth levered at 3x

² The merger agreement with S&P Global restricts IHS Markit's ability to purchase its shares and therefore IHS Markit's share repurchase program is currently suspended through November 2021, other than for the repurchase of shares associated with tax withholding requirements for share-based compensation.

Multiple levers will drive achievement of long-term financial objectives and total shareholder return

TECHNOLOGY & PRODUCT DEVELOPMENT

New product innovation and technology development

New product sales and cross-selling opportunities

5-7% organic revenue growth

BUSINESS MODEL

Operating leverage and cost synergies

Margin expansion and high cash conversion

Adjusted EBITDA margin growth to mid 40% range with mid 60s FCF conversion rate

STRUCTURE

Investment capacity from cash conversion and efficient tax structure

Consistent return of capital and continued investment

Double-digit Adjusted EPS growth

Environmental, Social and Corporate Governance

Our Vision

Sustainability is about using best practices to manage our business, always with an eye to the future; delivering a thriving and inclusive environment that lets our employees succeed and have time to make a difference in the world; reducing the use of natural resources; minimizing any risks to our brand and reputation; and helping our customers understand and address their ESG challenges

We commit to:

- Address material environmental, social and governance (ESG) issues, which helps ensure that we are structured for long-term success in a changing business environment, while helping our customers advance their sustainability strategies
- Strengthen our communities by supporting not-for-profit organizations and causes through volunteering, as well as cash and in-kind donations
- Advance environmental stewardship including taking steps to mitigate the effects of climate change
- Foster an inclusive and innovative environment

IHS Markit
supports the SDGs

RE100

Achievements in an active year for ESG

IHS Markit's actions support the [UN Sustainable Development Goals](#) (SDGs). Below is our progress against eight of the 17 goals:

290,400

Community impact

(2012-2020) Employees contributed over 290,000 volunteer hours in their communities

11 SUSTAINABLE CITIES AND COMMUNITIES

79

Employee satisfaction

Achieved an overall employee satisfaction engagement score of 79 in 2020, positioning us above the global Glint benchmark of 74

8 DECENT WORK AND ECONOMIC GROWTH
